

As a long time customer of XM Satellite Radio, I appreciate having my news and music on cars radio free of commercial background noise!
If I want to get weather and traffic information on the road, that is just a big plus to me. Since I pay for this service, I think it is only reasonable that I have all benefit of any news and information possible. It does not seem fair that special interests among broadcasters would seek to forbid me from getting this service!

Please reject the petition #04-160 from NAB!

Respectfully;
Ronald Baker
